

PREMIUM**FLOOR**®

PREMIUM fattening panel for sheep

The PREMIUM fattening panel with 14 mm wide slits is ideally suitable for sheep farming. The panel distinguishes itself by a slip-proof and clean surface, ultimate stability and a very good support of the animals' hooves.

The fattening panel has a span of 800 mm which reduces the number of support beams required by up to 50%. The installation is easy and fast to do.

In addition, the panel is perfectly suitable for goat farming as well as for use in calf boxes and milking parlours. Made in Germany.
