PREMIUMFLOOR®

PREMIUM Electric polymer concrete heating panels

PREMIUMFLOOR have extended their range of products by self-supporting electric polymer concrete heating panels for flat decks and farrowing pens.

As from now on, the following electric polymer concrete heating panels are available:

- ◆ 400 mm wide x 1200 mm long (with an energy demand of 175 watts) – weight of 15 kg
- ◆ 500 mm wide x 1200 mm long (with an energy demand of 204 watts) – weight of 20 kg
- ◆ 600 mm wide x 1200 mm long (with an energy demand of 251 watts) – weight of 37 kg

The panels distinguish themselves by their slip-resistant and clean surface. They offer a high level of resting comfort with a perfect and even heat distribution for piglets. They can be integrated flexibly into any existing panel system. Nominal voltage: 230 V / 50 Hz. Installation acc. to DIN VDE 0100 to be done by an electrician.
