PREMIUM Rabbit panel

PREMIUMFLOOR have extended their range of products by a universal panel for rabbit breeding and fattening. This new plastic panel reduces the breeder's workload enormously when it comes to cleaning the stables. The panel is highly hygienic thanks to the fact that manure and urine are evacuated directly thus preventing humidity and odors from developing. Additionally, the panel distinguishes itself by its slip-resistant surface offering very good support for the paws.

Breeders can easily walk on the panels thanks to high level of stability. Waste-free installation because panels can be cut every 10 cms.

- ◆ Panel weight of 2.9 kg
- ◆ Openings in panel of 65 mm x 14 mm
- ◆ Slit share of 46 %
- ◆ Panel dimensions: 600 mm wide x 800 mm long
- ◆ Panels can be mounted easily on all 5 mm thick support beams
- ◆ High-quality polypropylene copolymer
- ◆ Made in Germany
