

NEW

PREMIUMFLOOR®

PREMIUM Fattening panel system with resting areas

The new PREMIUMFLOOR fattening panel with a slit share of 14 % can be used as a clean resting area for piglets and fattening pigs as well as for stable mounting of automatic feeders. Above all with requirements of a minimum share of 40-50% for resting areas in fattening, the surface remains extremely clean.

Being the perfect complimentary panel, it has a spanned width of 800 mm and a length of 400 mm. As a consequence, up to 50% of the support beams can be saved. Installation is fast and simple. The new PREMIUM fattening panel can be perfectly used from piglet breeding to fattening (wean to finish).
