Pleasure with your work brings excellence in results.
Aristotle

November 2009

Dear Sirs

In today's animal keeping, high-quality plastic floorings play a decisive roll for the economic success of the plant. Upon our customers' request, we have therefore developed the new plastic panel

Piglets 600 mm wide x 800 mm long, closed for up to 200 kg/m²
Art. No. 11630 (palette sizes of 60 or 120 units)

for you. With this product, we have met your demand for a closed passage area. Additionally, the new panel can be used for rest areas in nursery rooms.

In our new and updated brochure PREMIUMFLOOR, you will now also find the article numbers and animal weights per m².

For your information we have enclosed the positive product assessment for our new warm-water panel PREMIUM-THERME in the magazine *LAND & Forst* No. 37 of 10-09-2009.

No matter if it is a new construction or the renovation of an existing plant, we will be pleased to work out – in cooperation with you - the perfect solution for your flooring in order to ensure profitable animal keeping.

For the remaining weeks of this year, kindly receive our best wishes for a lot of success and a good turnover.

Yours faithfully

PREMIUMFLOOR GmbH
